

Show solidarity

Witnessing the depth of the economic and social crisis, the EDF Group Foundation promptly sprang into action. On March 31st 2020, its governing board voted to create an emergency Solidarity Fund of 2 million euros to help protect caregivers and the most disadvantaged, as well as promote economic recovery and encourage new sustainable and inclusive models. 204 projects were supported in 17 countries.

Positively impact society

2020 started with a new 4 year mandate built around 3 major causes: "Change for future generations", "Act for solidarity in communities" and "Channel our energies". The objective: back projects that have a genuine impact on civil society and promote the active involvement of EDF staff via skills-based and volunteer programs, in France and internationally.

2020, a year of intense mobilization

Serve the general interest

All the initiatives undertaken by the EDF Group Foundation aim to serve the general interest. They reflect its commitment to future generations and to those most in need. Focused on action, the Foundation intervenes in three main areas: environment, education and inclusion.

Act with ethics and integrity

The EDF Group Foundation subscribes to the principles and fundamental rights enshrined in the Universal Declaration of Human Rights, the United Nations Global Compact and the United Nations Convention against Corruption. It fights against fraud and corruption of all types, and implements stringent integrity oversight over its partners and the associations it supports.

Impact Assessment

The EDF Group Foundation is highly committed to measure its CSR performance to progress with its partners towards an increased impact on society at large in the coming years. The Foundation set KPI's for each supported project, the achievement of which is measured through an annual review carried out with the partner association. Part of the funding is hinged on the achievement of those goals. In addition, the Foundation carried out in 2020 a 180° assessment to measure the long-term impact of international projects of the last 5 years on local communities, which demonstrated an impact sustainability of 90%.

Projects for a better shared future

Education

Support associations that work with disadvantaged youth and school dropouts, with two main priorities in mind: "Equal opportunities" and "Culture and citizenship".

102

Projects

1 822 013 beneficiaries
2 528 891 € allocated

Environment

Finance various community initiatives and educational and awareness projects related to environmental issues, biodiversity and sustainable practices.

34

Projects

2 105 946 beneficiaries
853 000 € allocated

Inclusion

Participate in projects that foster the social and professional inclusion of underprivileged people in France, and promote projects that allow access to essential goods through electricity in developing countries.

228

Projects

869 952 beneficiaries
3 240 334 € allocated

Employee engagement lies at the very heart of both the EDF Group's and the Foundation's DNA. Volunteering one's time, sharing know-how during work hours or time off, in 2020 the Group's employees were very creative in maintaining essential social ties and helping the most vulnerable despite the uncertain health-care context.

Espace Fondation EDF

A cultural and educational space, the Espace Fondation EDF helps young generations discover and understand the major issues of today's world. It stages exhibitions and animations that question current events by blending art, environment and science. In 2020, over 9 000 visitors discovered the exhibitions: "Black Bamboo" and "Green Currents, Create for the environment", whose objective is to question the relationship between humankind and nature.
